 EcolLet_proposal.docx;

Thank you for your proposal for a "Methods" paper to Ecology Letters. The proposal looks interesting and I am hereby inviting a full manuscript submission. The proposed word length is acceptable. In preparing your manuscript, please consider the following:

- Methods articles are intended to introduce specific, generalizable research techniques to the ecology research community. Articles that merely introduce existing
- To be generally accessible, statistical contributions should be accompanied by high quality, open access, source code, and demonstrated in a case study.

Please let Nathalie and Stephane (cc'ed) know a date by which you anticipate submitting a manuscript so that we can include it in our planning. Additionally, when you submit your manuscript, please identify members of our editorial board who would be appropriate handling editors for this work. A full list of editors may be accessed online at <https://onlinelibrary.wiley.com/page/journal/14610248/homepage/editorialboard.html>.

Please note that acceptance of a proposal in no way preempts the likely acceptance of a manuscript in that all manuscripts are subject to the journal's full evaluation procedures and it is often hard for us to judge a manuscript based on a short proposal. Of course, we hope you are successful.

Sincerely yours,
 John Drake, Senior Editor

Objet: Method manuscript proposal

Dear Editors,

Please find attached our proposal for a "Method" article in Ecology Letters.
 We look forward to hearing from you.

Best,
 Ismael V. Brack
